

Die Mittel für Emotionen sind für eine Denkweise, die aus dem Zeitraum nach der Geburt herrührt, oder die man sich durch Erfahrungen oder Erinnerungen angeeignet hat. Mittel aus der Borna Viren-, Bewusstseinsklärende Kombinationen- und Schicksals Verbindungsgruppe basieren alle auf spezifischen Viren, die verschiedenste Emotionen entweder blockieren oder extrem verstärken.

Auch eine geistige Haltung verfügt über eine bestimmte Schwingung und diese Mittel basieren auf genau diesen Schwingungen. Während manche der Mittel die Gefühle beeinflussen, setzt diese Mittelgruppe an den emotional eher holprigen Stellen im Leben an.

Es gibt Leute die meinen, dass alle Erkrankungen auf Emotionen beruhen. In dieser Aussage liegt sehr viel Wahrheit. Es ist jedoch auch wahr, dass der Gedanke, dass alle Emotionen, die mit einem selbst zu tun haben, die Basis für jedwede Krankheit sind, an der ganzen Wahrheit um ein kleines Stück vorbeischießen.

Wir sehen die westlichen Ansichten in Bezug auf Emotionen als ein wenig flach an. In der Tradition der amerikanischen Ureinwohner wurden alle Entscheidungen für große Veränderungen in der Gruppe, in Rücksprache mit den bereits verstorbenen Stammesältesten – bis zu sieben Generation zurück - getroffen. Viele Gruppen funktionieren auf der Grundlage von altehrwürdiger Tradition, die ein Teil dessen ist, was eine Gruppe oder Zivilisation ausmacht. Viele haben Versprechen in einem vorherigen Leben gemacht, die sie in diesem Leben noch halten. Manche haben Vereinbarungen mit Gruppen getroffen, die nur in der Vergangenheit zu existieren scheinen. Doch sie leben in einem tieferen Teil unserer Ehre, unseren Verpflichtungen und unserem Schicksalsgefühl weiter. Die Errungenschaften und Misserfolge unserer Vorfahren werden in unseren Knochen, in unserer chemischen Zusammensetzung, festgehalten.

Aus diesen Gründen glauben wir, dass es weise ist, uns auf die Suche und das Finden unserer Lebensaufgabe zu konzentrieren. Jeder von uns hat eine Absicht gehabt als er sich zur Wiedergeburt entschloss. Irgendwo, tief in unserem Inneren, wissen wir das. Wir müssen diese Absicht leben, um wirklich erfüllt und glücklich zu sein. Die Welt erfordert es, dass wir unserem Ziel näher kommen, weil jeder einen wertvollen Beitrag zur Welt zu leisten hat. Es ergibt keinen Sinn, uns von den gesellschaftlichen Mode Erscheinungen, dem Handelsgeist und Konflikten blenden zu lassen. Es ist sinnvoll, das zu tun wozu wir hier sind und unser Leben nicht in einem oberflächlichen Dasein zu verschwenden.

In vergangenen Seminaren haben wir von Mitteln gesprochen, die das Leben einzelner zum Besseren verändert haben. Hier haben wir ein paar Erkenntnisse festgehalten.

Viele Leute, die sich von alternativen Wegen zur Erlangung von Gesundheit angezogen fühlen, tragen einen Hang zur Unabhängigkeit in sich. Einige tragen **Penituberculosis** in sich, welches ihre Chemie derart beeinflusst, dass diese ihr Leben kontrolliert. Sie sind gezwungen ihr ganzes Leben in einer Art Protest zu leben, obwohl sie selbst dieses Wort nicht benutzen würden. Sie leben gegen die Kultur, auch wenn die Kultur doch ihren Wert hat. Sie können Fähigkeiten erworben haben, damit gut umzugehen... oder auch nicht. Sie können weder ihr vollständiges, kreatives Potenzial anzapfen, noch ihre Lebensaufgabe vollständig erfüllen, solange sie noch protestieren. Oft werden mehr als sieben Megaflaschen benötigt um diese Kombination aus der Leber zu bekommen – und das ist es auf jeden Fall wert, egal wie viele Flaschen benötigt werden.

Das Mittel **Safe** ist für diejenigen, die sich in der Welt nicht sicher genug, nicht ausreichend geschützt oder unterstützt fühlen. Wir haben Leute zittern sehen, wenn sie die Flasche nur in den Händen hielten. Andere erzählten uns, dass sie anfangen, sich in der Welt wohl zu fühlen, und aufhören konnten alles zu fürchten und sich gegen alles zu verteidigen.

Die Mittel **Brain Broil, Brain Nibble, Brain Crowd, Bejel, Pinta** und **Yaws** befreien den Verstand derart, dass Leute das Gefühl hatten, ihnen hätte jemand eine nasse Decke vom Kopf genommen. Manche der oben genannten sind nicht in der folgenden Liste aufgeführt, sind aber trotzdem emotional wertvoll, sowie mental befreiend.

Shock findet man in viele Nebennieren eingebettet und vergessen. Trotzdem setzt es immer noch der Energie und den Emotionen zu. **Grief** und **Fear** können genauso versteckt vorhanden sein. Sie beeinträchtigen das Selbstwertgefühl (**Worth**). **Trust** und **Doubt** haben zentnerschwere Steine von Herzen geräumt.

Abschließend, wenn Sie emotionale Stabilität suchen, gehen Sie zu den Arbeitsblättern Diabetes und Blutzucker. Je stabiler ihr Blutzucker ist, desto stabiler sind auch die Emotionen.

EMOTIONENMITTEL * Mittel in Kursivschrift sind dieses Jahr neu hinzugekommen *

Für die deutsche Mittelbeschreibung siehe die Masterliste!

ACON	ACONITE	H	Severe, soul-deep shocks, sometimes associated with severe physical shocks. Physical & mental restlessness accompanied with fear.
AC BMN	AMYGDALA COMPLETION - BASOMEDIAL NUCLEUS	MVB	Large need to be number one usually by attempts at dominance. Learning is inhibited by need to be smarter or argumentative to prove his/her point. A loner because he/she often alienates the other children. Loyalty is usually subordinate to gaining superiority. Will turn on other students, teachers or even parents when feels independence or authority is challenged. The first child we found was deemed a sociopath and expelled from school.
AC BSLN	AMYGDALA COMPLETION - BASOLATERAL NUCLEUS	MVB	The incomplete development of the Limbic kingpin causes the subject to override education and experience to make incorrect decisions. The "wild side" predominates and there are continual teenager types of "wild" thinking and behavior.
AC CNLN	AMYGDALA COMPLETION - CENTRAL NUCLEUS	MVB	Causes decreased ability to emotionally express to and relate to others. Depending on possible infections; (1) (with Bacteria Fragilis) fear of interfacing with others (2) (w/Rubella Malaise) fear of being judged. Blocks to abundance are a primary symptom, although the other nuclei can have other ways of blocking abundance.
AC CRTN	AMYGDALA COMPLETION - CORTICAL NUCLEUS	MVB	Can't stand to lose or be wrong. Can be highly competitive in select areas. Difficulty learning new. Small retention. Inability to apply what is learned.
AC LTLN	AMYGDALA COMPLETION - LATERAL NUCLEUS	MVB	Causes multiple, irrational claustrophobic like fears. A reluctance or fear of letting self fully develop is matched by remarkably clear understanding of the same potential in others. Self worth is known, but hard to acknowledge even to self.
AC MDLN	AMYGDALA COMPLETION - MEDIAL NUCLEUS	MVB	More bravado than reasoning. Like a born salesman, doesn't hear instructions well and does things on his/her own creation (which sometimes work well). Difficulty concentrating like most of the other Amygdala completion remedies. A deep desire to be significant coupled with fears of being insignificant. With Chromomycosis there is an attitude that the world owes him or her, plus there is no desire to work and a pattern towards couch potato or video games and every inclination to live off others. With Chromomycosis, if you ask the person to do something of value there is indignation. With Coxsackie A, there is inclination to seedy (pornography) or criminal activities
AC STLK	AMYGDALA COMPLETION - STALK	MVB	An incomplete Amygdala Stalk usually invokes some form of spiritual quest. It leaves a desire to find a greater union with whatever the subject defines as God. The incomplete amygdala stalk creates a sense of incompleteness and gap in the deepest level of feeling. There is a yearning for a sense of connectedness that we intellectually know is already there, Yet the subject willingly pursues the emotion of it through spiritual or religious acts. Most people in ecclesiastical positions have this. Most devout religious followers have this. Most in the spiritual side of metaphysics have this. The remedy is designed to help the achievement of knowing and feeling your connection.

AD ESTR	ANTIBODY DISSOLVE ESTRANGEMENT	MVB	A weak thymus makes a "killer cell" for a part of the brain that makes social connection and compatibility with family and friends. This remedy antidotes the "killer cell" so that the brain again connects and the subject achieves natural social connections.
AMG ABN	AMYGDALOMA-ABANDONMENT	MVB	Judgments about the world made usually around age 4 are made in the amygdala, the organ that balances emotions and reason. At that age the thoughts are usually about the child's interface with love on earth. Negative thoughts are virtually broadcasted for the whole life into the endorphin/ hormone structure. Much of our body and systems will form around them. They often are broadcasted so often that they cause amygdaloma and are locked into the system. Treat these like any other lump with retroviruses, Coxsackie's, etc. and free the whole body for new structure from the indicated thought. In this thought form some member of the family leaves either by death, divorce or substance from alcohol to sugar imbalances. The child feels that the carriers of love will always abandon them and carries the pattern into the rest of the life.
AMG INS	AMYGDALOMA-INSUFFICIENCY	MVB	Judgments about the world made usually around age 4 are made in the amygdala, the organ that balances emotions and reason. At that age the thoughts are usually about the child's interface with love on earth. Negative thoughts are virtually broadcasted for the whole life into the endorphin/ hormone structure. Much of our body and systems will form around them. They often are broadcasted so often that they cause amygdaloma and are locked into the system. Treat these like any other lump with retroviruses, Coxsackie's, etc. and free the whole body for new structure from the indicated thought. In this thought form the child felt insufficient to bring love into a family for the child to feel loved.
AMG MLC	AMYGDALA MALACIA	MVB	With age we often see the amygdala soften. Correspondingly so does desire, engorgement of sexual organs and ambition. The most common sign is teariness when telling or recalling emotional stories and memories.
AMG VLT	AMYGDALOMA-VIOLATED	MVB	Judgments about the world made usually around age 4 are made in the amygdala, the organ that balances emotions and reason. At that age the thoughts are usually about the child's interface with love on earth. Negative thoughts are virtually broadcasted for the whole life into the endorphin/ hormone structure. Much of our body and systems will form around them. They often are broadcasted so often that they cause amygdaloma and are locked into the system. Treat these like any other lump with retroviruses, Coxsackie's, etc. and free the whole body for new structure from the indicated thought. In this thought form the child believes they were violated either by incest, rape, ridicule or chastisement, usually by the parents. Regardless of the reality, the child will feel the whole world will violate him or her and ratifies the belief by attracting or imagining the scenario through life.
ANGER	ANGER	E	Locked in emotions that need help bringing out.
BET TK	BETTER THINKING	V	A virus that causes confused thinking and processing.
BET TK2	BETTER THINKING 2	V	A virus that causes confusion, paranoia, disorientation, extreme forgetfulness and anger.
BET TK3	BETTER THINKING 3	MVB	A thymus remedy for making a phagocyte that eats amyloid (found in all cases of Alzheimer's and most cases of dementia).
BET TK4	BETTER THINKING 4	MVB	A specific enzyme that eats amyloid deposits. It is designed to support BET TK3 until naturally made phagocytes can complete the amyloid destruction permanently.

BH RBC	BLOOD HEALER RED BLOOD CELLS	P	A spirochete that is attracted to weakened red blood cells, especially prevalent in bone infections and blood diseases. It compounds red blood cell difficulties by eating the good red blood cells as well as the weakened red blood cells. When taking the remedy in the first two bottles there is a strange apathy stage in which sustained activity or activity in the face of adversity is difficult. You feel like you don't want to fight it or you don't want to exert yourself in projects. The stage passes.
BRIBRI	BERIBERI	D	Vitamin B1 deficiency that often causes mental confusion and forgetfulness. Often with other brain issues.
BRN B&S	BRAIN BROIL AND SIMMER	MVB	A double bacteria infection in the brain that is not lethal or demanding. However, it makes the subject defiant to all statements of authority and absolutes, even when they are true and helpful. The life feels like it is always "cooking" on broil. There is feeling of many issues in the world that are not resolved very directly apply to the subject far more personally than is true. The infection makes a sense of constant turmoil which will noticeably decrease as the infection goes away. It is very difficult to learn with this condition. It is far too easy to rebel and fight when it is usually unnecessary and needlessly controls thoughts, emotions and happiness.
BRN BRL	BRAIN BROIL	B	A form of spirochete leprosy that can invade any part of the brain including Pituitary, Hypothalamus, Thalamus and Epithalamus. In this area the bacteria has a feeling for the subject that some part of their body and life is broiling. The condition leads to adrenal and thyroid exhaustion.
BRN CRD	BRAIN CROWD	B	A bacteria that invades the brain and swells to the point where other brain cells are crowded out of their function. Often seen with CEL SEN as well as weight issues. Very common.
BRN DRK	BRAIN DARK	MBF	A mass that crowds the pineal causing forms of paranoia and a gate of entry for negativity.
BRN NIB	BRAIN NIBBLE	VF	A slow acting pathogen that deteriorates brain function. It causes a multitude of weaknesses in the function of the body. It can cause argumentative personalities, very critical attitudes and a variety of memory problems. It is included in broader spectrum remedies such as CEL SEN and CEM SEN.
BRN WI	BRAIN WAVE INTEGRITY	MVB	An antidote to broadcasted signals that interrupt the thalamus and all memory processes. It becomes hard to remember systems, numbers, time, etc. The interruption even goes deeper to the very foundation of what you love and why. The depth of disassociation causes an anger and confusion so pervasive in the life that the subject has trouble identifying why they are upset. Physically there is a thick feeling in the head, sometimes a sore throat, sometimes a cough and sometimes a runny nose. Although technically different, this remedy belongs in the category of chemtrails.
BRS HI	BRAIN SUGAR HIGH	MVB	A pancreas/adrenal disease that on the low end fills the brain with sugar and on the high end floods the brain with sugar. The adrenals under stress cause the overflow. It is good for non-stressful mental stamina until the body becomes tired and the overload makes you light-headed. Localized headaches that often change locations is a major clue. Infections by fungi and yeasts are common. Easy production of mucous in cold air while sleeping is common. There is a strange phenomena of decreasing sensitivity to homeopathics observed with this issue.

BRS LOW	BRAIN SUGAR LOW	MVB	A pancreas/adrenal disease that insufficiently converts glucagon and glycogen into brain food. The condition is stimulated by adrenal demand for sugar energy. This is a basis for stress-induced blacking out, some forms of narcolepsy and most forms of seizures. As this takes hold, very little stress is needed to activate it and starve the brain. Thirst with tiredness is a major clue. Light sleepers are a minor clue. Alcohol effects it by reducing pancreatic ability to convert sugar in general. Easy mucous production with cold air while sleeping is a major clue.
BTR ANT	BETRAYAL ANTIDOTE	E	For those who carry deep thoughts, usually buried, of BETRAYAL - usually by God and/or someone who represents God to them.
CALM	CALM	E	For calm during change that entails confusion, instability and anxiety.
CLOSFB	CLAUSTROPHOBIA	E	Fear of closed spaces caused by Syphilis miasm in the pituitary and several bacteria.
CMPNY	COMPANY	E	For the feeling of loneliness
CNS MST	CONSCIOUSNESS MASOCHIST	E	This feels to the subjects like whenever they get close to reuniting with their sense of consciousness, flow of life or union with the universe, they need to attract an influence that will beat them back out of that realization. The base fear of attainment is often based on a past life travesty when consciousness was realized and the subject was punished
CON ANG	CONTRAIL ANGER	VB	Combination that "eats" the liver and white blood cells simultaneously so that anger often accompanies both digestive difficulties and immune loss.
CON AVD	CONFLICT AVOIDANCE	MVB	Some would rather avoid acknowledgement of intolerable situations or anything worse just to avoid conflict. This remedy helps shift the attitude to calling a situation as it is. The process does not necessarily bring conflict, but instead focuses on solution.
CON DES	CONTRAIL DESPONDENCY	CVB	Makes person tired, apathetic and very irritated. Uncharacteristic thoughts of suicide often arise.
CORECT	CORRECT	E	SHAME usually comes from feeling wrong in the eyes of God and unacceptable to self and others. Often buried.
CTRL IN	CONTROL INTOLERANCE	E	A triple liver infection led by the grain mycotoxin, deoxynivalenol. The subject inwardly (and often outwardly) bristles about being controlled or manipulated. The infection often makes a person a loaner, even though they like other people. It's a hot button in relationships when there is even a thought of either emotion. The combination infection makes blood sugar rise.
DISGST	DISGUST	E	The emotion can be general or specific or both. It lodges in the Insula of the brain and negatively affects the limbic system. Some believe it causes the "fat switch" to turn on. It may be further guided by a sense of superiority over others or a judgment of others being inferior to the subject. Superiority/Inferiority in some manner plays a large role in this emotion. The emotion is a remarkable block to love, evolution, spirituality and success.
DMND OV	DEMAND OVERFLOW	MVB	We all have demands placed on us. We all have different overflow points based on our judgments of our abilities to meet the demands. A mother with 1 or more children has 24/7 demands. If she has a childhood memory of being (or feeling) inadequate, her overflow point will be earlier than a mother without such self-judgments. Overwhelming demands on us overwhelm our adrenals, our thymuses and our pituitaries. The result is exhaustion, edginess, overweight and hormonal upsets that cause depression and infection.
DOUBT	DOUBT	E	Doubt about who we are and our ability to find and do what we came to do.
DRAC	DRACUNCULIASIS	P	Eats blood often causing chalky complexion. Possessors lose sense of security.

DSPNT	DISAPPOINTMENT	E	Disappointments in life may not be conscious (i.e. person is not aware of disappointment) or may have been dismissed as history. They carry an underlying sadness and distrust of many things as well as people. There is a reluctance to get involved with some relationships or efforts for fear the disappointment will be repeated.
DTX SHK	DETOX SHOCK	MVB	<i>Detoxing becomes nauseous, dizzy, panicky, face swells, ear membrane swells; can't breathe but can't swallow, roof of mouth swells, upper eyelids tighten (is same in anaphylactic shock). The body swells if it doesn't move. Water flushes toxins and makes the body swell, so there is an aversion to drinking water. If the subject does not move toxins, the toxins exit through the skin. Muscles torque bones. This was found to have strong emotional release value after abuse history.</i>
EB FEML	ENJOY BEING FEMALE	MVB	Removes blocks in the liver that prevents a woman from enjoying being a female.
EB MALE	ENJOY BEING MALE	MVB	Removes blocks in the liver that prevents a man from enjoying being male.
EB YOU	ENJOY BEING YOU	MVB	Removes blocks in the liver that prevents a person from enjoying being themselves.
EMO CLR	EMOTIONAL CLEARING	MVB	A physical condition of the pons of the brain that holds the judgments, hurts and shocks that we call negative emotions. The blockage prevents emotional processing and often prevents physical healing of other parts of the body. Emotional upsets in the life will spur this condition to cause diseases by interrupting nerve flow and prevent healing for the same reason. Women often feel this condition. Men need to know the blockage is like a kink in a garden hose of the mind.
EMO RSP	EMOTIONAL RESPONSE	E	For the negative physical effect on the connection of hormones and nerves in response to an overload of emotions. The response may build slowly and be cumulative to a number of emotions. Part of the symptoms are back pains, hair loss, low libido, sexual dysfunction, digestive upset, frequent urination, tinnitus and eyesight difficulty.
EMT SCR	EMOTIONAL SCARS	E	The memories that hurt and distort our perception of the world
END GAT	ENDORPHIN GATE	MVB	The formulative material for all endorphins is made in the thalamus medulla. A miasmatic condition in most humans, usually started between age 55 and 60, begins shutting down the cofactor of hormones and nerves, depleting both.
ENDR CN	ENDORPHINE CENTER ENGAGE	E	The Thalamus synthesizes endorphintides into endorphins. If, at some time during the early development before age 3, the child is disconnected (physically or emotionally) from the mother, the synthesis center does not fully develop. Later in life this can become (1) the subconscious "hole" in self acceptance (2) the pursuit of something or others to fill the hole or (3) the resignation that life often excludes happiness. The type of patterns that develop are (1) needy relationships (2) co-dependency on others, or with drugs, alcohol or tobacco (3) overly serious/under happiness attitudes, professions or life. The remedy seeks to rekindle the synthesis of endorphins so the life is happier, dependency reduces and even physical healing increases.
ERGOT	ERGOT	F	Liver mold that precedes inability to detox chemicals and alcohol and is often a component of liver cirrhosis. Mental problems plus allergies.
ERTH MG	EARTH MAGNETIC RHYTHM	S	Stabilizes the feeling of magnetic rhythm disrupted by the Mars effect on the Earth's core. Since women are more sensitive to magnetic disruptions most of the symptoms for this remedy are in women as nausea, emotional tiredness and physical susceptibility to infections. Because men are more sensitive to electrical disturbances, see SUN ELC for Mars effect on men.

FEAR	FEAR	E	Stuck emotion that needs help to process out.
FEAR MR	FEAR MEMORY	MVB	A history of fear locks in the Hippocampus and becomes a physical Beta Endorphin reverser. The effect spreads through the diencephalon inhibiting hormones and other endorphins. Life is therefore seen through negative endorphins as a struggle and a series of threats. The negative endorphins overtax the thymus to demise and virtually shut down the hormonal system.
FEAR PM	FEAR OF POWER MISUSE	E	This remedy does not automatically make you powerful. It is aimed at eliminating the fear that may be an unnecessary center pole for your life. If the fear is gone you can develop your life, whether or not power may come with it. If you avoid possibilities because power "might" develop out of it, then you avoid life. This fear is behind most autistic children who purposefully disabled themselves for fear of misusing power again.
FEAR RS	FEAR OF NOT BEING RESPONSIBLE ENOUGH	MVB	The subject may be one of the most responsible persons we know, but they may still fear that they are not responsible enough.
FIS PIC	PFIESTERIA PISCICIDA	PB	New microorganism from hogs (to fish) to humans attacking the brain myelin sheath, causing anything from abhorrent behavior to craziness.
FOR POL	FOUR POLES	MB	Two possible forms of Bipolar in the same bottle. See also Two Poles.
FRD WRM	FRIENDSHIP AND WARMTH	E	For liver infections that discline the subject towards emotional warmth with others. The infections cause fears, insecurity and negativity instead of the desired warmth with others.
FRGIV	FORGIVENESS	E	Too often this word is religiously misused in English as a status of being "holier than thou". The meaning has become significant of being able to "turn the other cheek". The person, consciously or unconsciously, can thus display or claim that they are superior to the forgiven (even when the forgiven is themself). This remedy is aimed at helping the subject return to the original meaning of the word. It helps the subject see all things as a reason " for giving" thanks, with no attempt at disguised one upmanship.
GLT ANT	GUILT ANTIDOTE	E	Buried GUILT produces subconscious self assessment of deserving punishment and failure.
GRAT GN	GRATITUDE GAIN	E	Usually for the child or adult who always wants more (more things, more attention, more praise, etc). The remedy aims to open the channel in the brain that acknowledges and appreciates what the subject already has.
GRIEF	GRIEF	E	Grief does need to be processed, even if it is decades after the EVENT.
GROUND	GROUNDING	E	A sense of feeling comfortable to live in the earth plane instead of trying to escape.
HP EF	HYPOTHALAMUS EXHAUSTION FEMALE	MVB	Causes a loss of libido/sex drive in females interested in males. (An enzyme in the Hypothalamus is changed).
HP EM	HYPOTHALAMUS EXHAUSTION MALE	MVB	Causes a loss of libido/sex drive in males interested in females. (An enzyme in the Hypothalamus is changed).
HRT SOL	HEART AND SOUL	E	A remedy that aims to reattune the 4th (heart) chakra both to the soul and to the thymus of the individual. It also aims to cancel the magnetic interruption of the thymus/ 4th chakra connection and function.
IN THUN	INNER THUNDER	MVB	A combination of factors aimed at restoring exciting hormones in menopause and post-menopause humans. It is designed to help reverse menopause without reinstating fertility.
INT INC	INTUITION INCREASE	E	A mold in the thalamus that blocks one's intuition.

INTM HR	INTIMACY & HURTS	E	Multiple molds and toxins in the liver create a sense that intimacy will only produce hurts. If you have this condition, you immediately agree with the first statement. The remedy seeks to allow intimacy to rightfully expand the feelings of the person who might otherwise welcome intimacy.
JITRS	JITTERS	B	Bacteria on adrenals that instigates other diseases and causes nervous tension
JOY FER	JOY FEAR	E	Fear of enjoying our direction in life, our fuller accomplishment and the joy of being all we are.
JUMPY	JUMPY	MF	Based on Syphilis Miasm in the brain, a combination of fungi like bipolar makes the person anxiety-ridden.
KNIRAN	KNOWING I'M RECOGNIZED AS NEEDED	E	For all people who know they have capabilities needed. By establishing this vibration in themselves it reawakens the use of the abilities plus lets others know around the world how to acknowledge the value that each of us have to the whole.
LIM FIB	LIMBIC FIBROSIS	MVB	An inherited disease that turns nerves into fibroid tissue in the brain area of emotions called the Limbic System. The disease also weakens the thyroid, parathyroid, liver, adrenals and reproductive glands. Subjects often have trouble enjoying life and often alienate others. When the condition is severe enough it causes a tumor - Tuber fibro leio myxo schwannoma (with 2 retroviruses) - that turns decreasing enjoyment to anger and some form of self-ostracizing behavior.
LIM ZIM	LIMBIC ZIMBIC	MVF	Unblocks the limbic system where pleasure is processed and helps the release of healing endorphins.
LMB GRL	LIMBIC GROWL	MVB	By the time this comes the person is generally unhappy, whether quietly or loudly. Many things are upsetting and complaints, arguments, demands are frequent. There is loss of memory that resembles angry Alzheimer's (this often mixes with Alzheimer's to cause anger). The subject often sees many other people as moody but does not see self that way. Periods of personal charm also shine. It is hard to see this in self. Take it for the ones you may be alienating and don't know it if you find yourself often upset in retrospect. Since you can't get hurt if this does not 100% apply, it is worth taking as a precaution and prevention of a person you don't want to become.
LOV ABS	LOVE FOR ABUSE	E	We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. If you have chosen the role of whipping person or victim, you may have allowed many people to love you for dodging their own issues. You later seek marital mates who are dodging their own issues and you may start to play the parent who blames others for your foibles. A life based on creation instead of blame works better. See BVC Victim Payoff.
LOV BLK	LOVE BLOCK	F	A fungus on the pons of the brain affects coordination and speech response PLUS deters the person's ability to accept love.
LOV DFN	LOVE FOR DEFIANCE	E	We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness.

			<p>Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. The rebel may be what got everybody's attention and made your parents love you for being so independent (less work for them). You could later get yourself in trouble with the law and the pattern could windup putting you in jail. A blend of cooperation and independence may now serve you better. See also Penituberculosis.</p>
LOV FLR	LOVE FOR FAILURE	<i>E</i>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. In this instance the pattern of failure solicited the feeling of superiority in parents and elicited a pity love. The subject never has quite enough confidence in themselves. Consequently they often apply themselves to fields where success is not well measured from employment to personal looks to non-measured sports (like surfing) to social gadflies. It seems a violation of parental love (which often translate</p>
LOV HR	LOVE FOR HATING THE RICH	<i>E</i>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. Henry Ford said there are those who think they can and those who think they can't and they're both right. The only difference of the rich and those who hate the rich is the attitude towards wealth. If you think the wealthy are inherently evil you need to look in our prisons to realize the wealthy have no corner on evilness. Don't criticize it until you've tried it. If you let yourself become rich you have every opportunity to prove that rich does not equal evil.</p>
LOV INF	LOVE FOR INFERIORITY	<i>E</i>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. In this instance acting inferior locks a person into constant study and analyzing. No matter how much is learned or known, it never feels enough to use well in life. It often locks a person in their head instead of their heart.</p>

<p>LOV INV</p>	<p>LOVE FOR INVISIBILITY</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. In this instance the subject was loved for not being a visible and/or present factor in life. Subsequently the person lives by never being themselves, not being a factor in others lives and, most important, not being a factor in their own life. Talents and abilities are put aside in the belief they would only interfere in others lives and not be welcome. Life is lived on the fringe of society. Jobs of responsibility (and good pay) are not sought because it would be too much interface with others..</p>
<p>LOV ME</p>	<p>LOVE FOR MEETING EXPECTATIONS</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. In this instance the subject learned to measure their life by the expectations of others. They consequently form their adult life around family and work where they constantly answer to the expectations of others. Forming a life around what they want is hardly a thought, much less a reality. Finding a purpose of their own is a true challenge and even more challenging to weave it through the patterns of meeting.</p>
<p>LOV NFT</p>	<p>LOVED FOR NOT FITTING</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. Trying to be invisible, undemanding of a role or place in life so as not to be a bother. The person feels like an alien to all walks of life. Often there is a seeking of the ethereal or spiritual from a sense of not belonging to a group or a walk of life in the material world.</p>

<p>LOV NLV</p>	<p>LOVE FOR NOT LOVING</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. This remedy is especially for children who felt conflict between parents. It was feared that loving one would cause rejection from the other parent. Not loving or expressing love to either becomes a pattern for subsequent relationships. There's a side pattern of not noticing or responding to the loving overtures of others for fear "somebody" else will feel jealous or rejected.</p>
<p>LOV NSV</p>	<p>LOVE FOR NOT SAVING</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. If your parents spent as they received money, then the child would be loved for the same pattern. It is a way of fitting in and condoning parent behavior.</p>
<p>LOV POR</p>	<p>LOVE FOR BEING POOR</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. If your parents had a poverty mentality, then to be loved, the child would adopt the same pattern. The parents may have had a sense of inability to earn money, no sense of their life calling (which would have brought money), a blame of the rich or some other anger that was more important to live than make money. These secondary issues may need to be also approached to dissolve the pattern. Poverty is expensive and worth dissolving.</p>
<p>LOV SCR</p>	<p>LOVE FOR SACRIFICE</p>	<p><i>E</i></p>	<p>We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. In this instance the pattern is sacrifice, a familiar religious pattern to be praised. When applied to all parts of the life, much is suppressed.</p>

LOV SSM	LOVE FOR STATUS SYMBOLS	E	We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. Some families expect children to have some status symbols to prove the parents are successful. Houses, cars, boats, degrees, jobs can become a way to be loved instead of tools to be successful. If you use the "things" to achieve your purpose in life you'll be happier, but you've got to distinguish symbol from tool by how much it helps you achieve your calling.
LOV WRK	LOVE FOR WORK	E	We all have subconscious strategies for love. Most are related on whatever resulted in love or attention from parents or peers. Deep inside it also felt as an act of your love to give another a way to express their love. The strategies become patterns applied to all circumstances, regardless of appropriateness. Whatever we feel worked in early life becomes a pattern that all the cells form around through the rest of life (or until you purposefully change the pattern). The patterns therefore have a physical vibration and can be dissolved to allow other actions that permit growth instead of limiting life. Workaholics express fulfillment from work and quietly harbor questions why they are always so busy. Many are too busy working to have social lives or to make money or to have hobbies and the list of limitations is endless. We are more than our work and this may be an important opportunity to break the pattern and learn other values. See also the Borna Virus Combination Work Work.
LRN SPK	LEARNING SPARK	VF	The most common complications to set into a vaccination-injured child. Often taken with VAC BRN and PIT CLK. Subjects usually have great apathy to school work and little interest in using their intellect, except in areas where they have emotional interest.
LYM DYS	LYMPHODYSPLASTIC LEUKEMIA	MVB	Similar to Myelodysplastic Leukemia, this corrects a lifelong tiredness resulting in low energy or willful pushing of self.
MEM SCR	MEMORY SCAR	MVB	The combination of factors that make and increase scar tissue in the brain formed by physical or emotional traumas in a person's life. We all have them. According to the German Dr Hammer, these scars start the body towards disease.
MRW MB1	MARROW MIASM BASE 1		<i>The marrow of the bone makes all the elements for the function of the body. If there is trouble in the marrow there will be trouble with the parts of the body. The remedy is composed of the most fundamental diseases humans (and all mammals) carry. Over 99% of humans carry this and it is the base of 90% of all saccharide (sugar) interference. The body has neither energy nor growth without saccharides. The remedy helps the whole body structure, including the chemistry of emotions that guide how we structure our life.</i>
MSUR UP	MEASURE UP	E	For fears that we do not "measure up" to some unknown, vague standard. It is the fear that if we don't perform a certain way (nobody seems to know exactly what that "way" is) that we won't fit in our favorite group or be accepted by that special someone.
MYL DYS	MYELODYSPLASTIC LEUKEMIA	MVB	aka Myelodysplastic Syndrome. Anemia that defies all other treatment is the chief symptom, followed by possible weight loss, anorexia, abdominal fullness

			(swollen spleen). LYFB LK, MYL LUK often involved. Exposure to benzene and/or radiation can trigger.
ODD	OPPOSITIONAL DEFIANT DISORDER	MFV	The name of the (usually) child disorder says it all. See also CHLD BP. Please remember this is physical and can be cured like a cold.
OT CAST	OUTCAST	E	A sense of not belonging spreads to not feeling loved or loveable in the future. The feeling can spread also to a sense of unable to succeed and even retaliatory criminality.
PAIN FR	PAIN FEAR OVERDRIVE	E	The Thalamus is the pain control center and the location of past life memories. The fear of pain from past life memories is connected to an excessive enzyme output which produces too much of an endorphin for the pain. Subjects sleep more than usual and respond to stress with the need for more sleep. The long term surplus of the endorphin inhibits exploration of new roads in life and dampens expression of the self. There is difficulty finding purpose and joy in life.
PAT EXP	PATTERN EXPANSION	MBF	For a disease of the ependyma/endothelium covering of the hippocampus. The disease creates angiotensin VI which contracts nerve axons. With this disease it becomes more difficult to expand out of pattern thinking, so it is harder to create or accept new thoughts, respond to opportunities and to initiate new projects.
PEN BTR	PENICILLIN BETRAYAL	F	Frequent feeling of betrayal, even to the point of attracting betrayal. There are also some digestion difficulties.
PEN ERG	PENIERGOT	F	This combination of two molds causes explosive, volcanic anger/rage that burns hot and quickly cools down. When it blows the person can hardly help themselves and doesn't understand why the people around them are still shaking when they are over it. Remember that ergot is the chief cause of cirrhosis of the liver and penicillin is the chief cause of house mold allergies. Life will be considerably more peaceful after finishing it, although the 1st couple bottles of the remedy may stir so additional anger first.
PEN TUB	PENITUBERCULOSIS	BF	Combination of fungus and bacteria usually found in the liver. The combination upsets the chemistry of the person so that their life is centered around protest in one way or another. The influence is so strong that it prevents the subject from ever getting to the creation of their life. Get ready for a wonderful major change in your life when you take this (and you need it). It is not uncommon to need over 20 bottles of this.
PKU LS	PHENYLKETONURIA LOVING SELF	MVB	An excess of the essential amino acid, phenylalanine bound with the carbon structure of ketones caused by an insufficiency of an enzyme yet to be named. This may be the boldest and most optimistic attempt to use the PKU series. It is designed to open our perspective about ourselves so that we see ourselves with more appreciation and self love. It won't make you an egomaniac and you may need a few Borna Virus Combination remedies to help you off the merry-go-round of self condemnation. See also CHASTISE, SELF LOATHING, CRITICAL SELF, etc..
PON PRS	PONS PRESENT	MVB	An impediment to the function of the pons that impedes the ability to genuinely love. Release often produces more natural expression of love and compassion.
POP NOT	POP NOT	MVB	An internal combination that reacts to the satellite broadcast which brings people to the point of popping their emotional corks. The planned broadcast pushes people to anger and to expressing anger in a way we all wish they didn't or we didn't. In other words, this is the time to keep a lid on your frustrations. Other combinations that don't need a satellite broadcast for popping anger are: peniaflatoxin, peniaflagot and peniergot.
PRCHT 1	PARACHUTE COMPLEX # 1	MVB	A virus grips the amygdala in a way that dictates selective, overriding thoughts in the emotional balancing part of the brain. All other thoughts are

			run through this emotional filter which causes a repeat of the dictated thought. That makes all thoughts influenced by this emotion so that every thought is part of the physiologically dictated judgment of the world. It closes off the subject to different realities. In these cases the # 1 virus dictates anxiety and doubts, so that a personality mind trait of the person becomes the same. Parachutes and minds work best when open.
PRCHT 2	PARACHUTE COMPLEX # 2	MVB	A virus grips the amygdala in a way that dictates selective, overriding thoughts in the emotional balancing part of the brain. All other thoughts are run through this emotional filter which causes a repeat of the dictated thought. That makes all thoughts influenced by this emotion so that every thought is part of the physiologically dictated judgment of the world. It closes off the subject to different realities. In these cases the # 2 virus dictates fixations. The propensity of the subject to form fixations on many things becomes "natural". Parachutes and minds work best when open.
PRCHT 3	PARACHUTE COMPLEX # 3	MVB	A virus grips the amygdala in a way that dictates selective, overriding thoughts in the emotional balancing part of the brain. All other thoughts are run through this emotional filter which causes a repeat of the dictated thought. That makes all thoughts influenced by this emotion so that every thought is part of the physiologically dictated judgment of the world. It closes off the subject to different realities. In these cases the # 3 virus dictates thoughts about judging the world relevant to fairness and justice. The world seems black or white; fair or not fair; right or wrong. That's great for judges and lousy for philosophers. It is also hard to live with outside the right profession. Parachutes and minds work best when open.
PRCHT 4	PARACHUTE COMPLEX # 4	MVB	A virus grips the amygdala in a way that dictates selective, overriding thoughts in the emotional balancing part of the brain. All other thoughts are run through this emotional filter which causes a repeat of the dictated thought. That makes all thoughts influenced by this emotion so that every thought is part of the physiologically dictated judgment of the world. It closes off the subject to different realities. In these cases the # 4 virus dictates disassociation from people and societies. The subjects separate themselves from many others and live in an isolated world, rarely able to let others into their life. Every thought becomes a means by which to push others away. Parachutes and minds work best when open.
R A G	RAGE	E	Most do not identify with the intensity of the word, but carry the consuming negativity in a way that shapes the whole life.
RA FALL	RA FALLOUT	C	Every once in awhile nuclear fallout dumps from the stratosphere from long ago tests. People become irritable and have headaches.
RABIES	RABIES	B	A bacteria thought to be exclusive to dogs that makes their bite dangerous. Contrary to popular opinion it passes to humans easily, often from the lick of an animal. We have used it frequently for children who have a propensity to bite other children. Afflicted adults often have argumentative personalities - bitey if you will.
REJOIN	REJOIN	E	For those who carry deep thoughts, usually buried, of ABANDONMENT and/or DESERTION.
RELAX	RELAX	E	Sometimes tensions create a need for the muscles to relax while the mind stays alert.

RES LES	RESTLESS	E	A combination of the vibrations of licorice root (for adrenals) and wild cherry bark (for pituitary). Intended for the times when you burn the candle at both ends and are exhausted (because the activity drained the adrenals and pituitary). A large help for hot flashes.
RESCUE	RESCUE	E	An old Bach Flower remedy that calms the body in an emotional crisis.
SAFE	SAFE	E	For those who deeply do not feel safe in the earth plane or safe to be alive in human form. Sometimes may accompany with SCHIZ.
SEAL AP	SEAL OF APPROVAL	MVB	A brain condition so deeply involved with our subconscious self approval that it prevents our thyroids from sealing our inner/outer skin correctly. Its symptoms in light cases start with "low thyroid", crusty to bloody nose, easy nose bleeds when picked and red spots on the skin. More severe cases have thick blood throughout the arteries, scant perspiration, double chins, various possible lesions of fingers, toes, tongue and lips. Subjects get very tired with age without thyroid supplement. Do you want to increase your self approval?
SEN ADR	SENSITIVE ADRENALS	MVB	Miasmatic condition making people emotionally overly sensitive to comments, possible slights, etc. - like an emotional hypochondriac.
SEN OVR	SENSORY OVERLOAD	MVB	An inherited nerve condition where neurons move slower than the input. Too many things to do, too many demands, too many activities can make you occasionally forgetful, panicky and even numb.
SEN SEN	SENSIBLE SENSUALITY	MVB	Adrenal Medulla, bilateral, hormone (yet to be discovered by science) for feeling the enjoyment of being your gender.
SHOCK	SHOCK	E	For an emotional shock usually that is recent (there can be long term shock locked in the body). Usually the person does not think completely rational, does not respond to some emotional input and cannot act fully rational after the event. There is also SHOCK GO, a Borna Virus Combination in which the person magnifies the effect of a shock beyond its proportion and won't let go of the issue in consciousness.
SLF ACP	SELF ACCEPTANCE		<i>A certain kind of muscle tension makes an "up-tight" feeling that diminishes self confidence. As the remedy helps the muscles relax, the self confidence rebuilds.</i>
SLF CNT	SELF CENTERED	MVB	If much of your life is winning arguments through intimidation (this will clearly take some honest introspection) so that you win a lot of battles and lose the war, then this remedy will help you. Usually after a breakup, being fired or running into the umpteenth wall, you are willing to look at this issue. Taking the remedy does not turn you into a wimp, but instead will help greater understanding of another's viewpoint so that you can make more harmonious solutions.
SLF DES	SELF DESTRUCTION	E	A judgment on our selves that impels us to sabotage our own successes and even try to kill us physically and/or emotionally.
SLF FND	SELF FINDING	MVB	The Amygdala (in the brain) is considered the emotional part of the brain that continues to grow through teenage years. Its changes are what make many teenagers such firecrackers. When it is incompletely formed, many are stuck in this transition of self identity, fears, vanities and need to be liked. Essentially it is hard to find who you are until this part of the brain is fully developed. This remedy aims to finish the Amygdala growth so that you can finish your teenage growth and find yourself. It prompts the question many have asked, "What am I going to do when I grow up". There are some cross-over aspects with the remedy, Peter Pan Syndrome. It may sound good to stay in a Peter Pan stage, but it also

			prolongs some of the continued patterns and pain of teenage years. Even in your 70s and 80s you may need this. For reasons we cannot yet identify, almost everybody who chews gum needs this. There are many who do not chew gum who also need it.
SLF IDN	SELF IDENTITY	E	Helps to have a feeling, a knowing of who we are in respect to our place and purpose in life. Most of the world would acknowledge needing this remedy.
SORROW	SORROW	E	Deep sadness that carries some form of helplessness to it.
STB DEF	STUBBORN DEFENSIVE	E	Most forms of stubbornness are based on a defense of some position thought to be important, even if it is more subconscious than conscious. If you find yourself more stubborn than helps you in life, use this to help dismantle the pattern and look for the issue you are defending. A little flexibility is a strong asset.
SUN ELC	SUN ELECTRICAL RHYTHM	S	Stabilizes the feeling of electrical rhythm disrupted by the Mars deflection of electrical rays from the sun. Since men are more susceptible to electrical disturbances from the sun, most of the symptoms are more commonly in men (starting near Feb, 2004).
SURV SS	SURVIVOR STRESS SYNDROME	E	This issue is usually deep in the subconscious, at the base of complex, interwoven life strategies. It is like a king pin remedy for difficult emotional problems. It spawns from fetal experiences when abortion was considered or attempted and there were conditions around gestation that made fetal survival questionable. The subjects are chameleon-like in their ability to do whatever it takes to (1) survive and (2) prosper. However prosperity is always only for survival and the person never seems to be happy about prosperity. Inner conflicts are usually as well-hidden as the stark fear of not surviving so that fear/stress is the only way of life known, until the issue is resolved. Diseases develop out of long-term stress.
T GRND	TEETH GRINDING	B	Also called Bruxism, this condition is caused by a specific bacteria in the adrenals.
TERROR	TERROR	E	The emotion is multiple times fear. It is paralyzing and produces strongly conflicting actions. Whether it comes from this lifetime or before it can so rule your decisions at a deep level that you think life is simply the way you live it (with terror). You may not think of this word, especially when the word terrorist is used so often in society, but think of it as an absolute ruler of your emotions and you might find its hidden presence.
TIG FOC	TIGER FOCUS	E	Helps adolescents enter puberty more gracefully and (somewhat) tame the hormone rush.
TIR CRN	TIRED & CRANKY	MVB	A miasm based insufficiency of adrenals. Long term pattern of getting so tired that the person is uncontrollably cranky. (Especially in menopause)
TOXO	TOXOPLASMOSIS	P	A more direct approach to the parasite when it is in other organs than the pancreas (kidneys, adrenals). Uplift/Sassafras oil still good for pancreas-location
TRAPED	TRAPPED	E	The subject feels confined or has an apprehension of feeling confined by an activity, like intimacy or marriage, or a job, or an organization.
TRUST	TRUST	E	Trust is a personal, spiritual realization of a divine flow. The sense of connection as well as the sense of the good is written in every religious book. Yet, it is still very personal. It is a feeling that transcends knowing. It is a wonderful requirement for all spiritual growth. Initial tests show that 35 to 60 bottles are not uncommon needs, which may be a statement about our current level of evolution. Don't be afraid to go for the whole need since fear or denial are the most common enemies of trust.
TWO POL	TWO POLES	MFB	Tuberculosis miasm in brain attracts pituitary fungus and CLM GRN for bipolar depression. LMF GRN also needed sometimes.

VILATD	VIOLATED	E	This feeling brings out defensiveness, anger and the propensity to push others away. It strongly controls a life, whether it is conscious or unconscious; real or imagined; or magnified past reality.
WORTH	WORTHWHILE	E	For those who carry thoughts, usually deeply buried, of WORTHLESSNESS
WOZ ADN	WOOZIE ADRENALS	MF	Inherited slowness of adrenal causing perpetual tiredness and drained thyroid, increasing to weight problems and depression.
YAWS	YAWS	B	This spirochete is called a "non-venereal" syphilis. It doesn't seem to understand the classification. This syphilis and the regular venereal syphilis (See SYF or BRN NIB) are often found accompanying genital herpes. In countries of good nutrition this seems symptomless, except many issues of a subject arise and don't heal well or easily. Nothing heals in the presence of venereal syphilis and the same is true to a lesser extent with Yaws.
ZNON TB	ZERALENONE TUBERCULOSIS	TB	A liver infection causing the subject to constantly search for what is wrong or deficient about a person or subject. Like the current reporter trend, no matter what is good or overwhelmingly laudable or beneficial, the subject will look for something to criticize. It would be like the relentless fixation of Mother Teresa's hangnails. The subject creates an image of negativity and can hardly curtail themselves. The subjects may learn social coping skills of looking positive, but the drive to tear something down is underlying. All because of a liver infection. See also <u>Negative Nogley</u> .
ZRNL TB	ZERALENOL TUBERCULOSIS	TB	A liver infection impelling the subject to change the viewpoint of someone or some group. If the subject has not yet found their life purpose, the subject may choose a number of subjects that he or she must change others' viewpoints. It makes for strangely combative relationships. The subject may make full effort like a driven salesperson to convince the other person. Whether the salesperson fails or succeeds, they soon abandon the other person when the effort no longer bears fruit. Not good for marriages, relationships with bosses or even friends. The subject is often at odds with authorities. All relationships suffer because of a liver infection. See also <u>Enemy</u> .
